

In extraordinary conflict of interests, Michael Powell bullied the American population by granting media giveaways, which he personally stands to profit from, to a handful of corporations which already dominate the public news awareness landscape -- while the American Public's Interests and the foundation of Democracy.. are left by the wayside. The American Public does not promote this move toward increased monopolization but the FCC majority of 1, prefers to bully the American Public rather than do their job which is to preserve public interests. You stold our airwaves today . . . and The People of American WILL NOT stand by idly as you sell Democracy. The 1996 de-regulations were a mistake and a horrific assault to the American population at large, and the deregulations being PUSHED by Michael Powell today, June 2, 2003 is the greatest assault on Free Speech the American People have experienced, . . just in time for the 2004 elections.

Shame on You.

Someone you don't care about -- the American Public Interest.
